## **eBankSystems Announces New Customer**

*Lubbock-based Banking Software Firm growing its base of community bank customers.*

**LUBBOCK, TX September 24, 2008...** eBankSystems, Inc., a leading provider of banking software applications and services for community banks, today announced First National Bank of Amherst has converted to Trinisys for its new core processing system. First National Bank also deployed branch processing software from eBank's item processing partner, Metavante Image Solutions.

First National Bank was established in 1925. The bank is family owned and operated and focuses primarily on agricultural lending.

According to Michael Eisenwine, operations manager of First National Bank, "eBank combines cutting edge technology with scalable solutions that make our bank more competitive and efficient in today's market. The support is solid, responsive, and some of the best I have seen from the bank service industry."

"It is important for community banks to be able to offer the same products and services that large banks do, and still be compliant with their regulators." Tripp Boren, Vice President of Operations, said. "We look forward to working with First National Bank to help them achieve their goals in these areas."

### **About eBankSystems**

eBankSystems is a solutions provider specializing in delivering complete turnkey systems for community banks. eBankSystems helps banks utilize technology to drive down costs, retain existing customers and attract new customers. Trinisys, eBankSystems flagship core processing application, allows banks to manage their operations efficiently and intuitively. eBankSystems partners with many industry leaders to provide ATM/EFT processing, Internet banking, mobile and voice banking, platform automation and more, allowing banks to choose which ancillary products work best for them.
