

Trinisys Check Writer

Trinisys Check Writer streamlines all your check writing activities. It saves you time and money and archives critical information you need for compliance and audit functions.

FLEXIBILITY

Trinisys Check Writer has forms that are fully customizable, allowing you to select the graphics and wording of your choice, with the ability to modify them “on the fly” at any time.

SAVE TIME

Automatic signing capability - based on user permissions, the Trinisys Check Writer can even automate signatures. For security, you can set amount thresholds to allow tellers to write checks up to a certain dollar amount, but require supervisor's signatures above that amount. Tellers don't have to obtain approval for every check they print, but supervisors still have the peace of mind of controlling the process.

Account reconciliations can be performed from Trinisys Check Writer, saving time and eliminating the need for spread sheets, paper logs and manual reconciliations. Trinisys Check Writer also prints complete reconciliation reports.

Historical data on checks can be archived, reviewed and queried. This feature eliminates manual research, saves time and provides a valuable audit trail.

Automates all the information needed for Monetary Instrument Log reporting, helping you to remain compliant with BSA.

Tight integration with Trinisys Accounts Payable, allows you to import all checks automatically, eliminating the duplication of work.

Completely integrated with eTeller, which saves time by allowing you to write checks without leaving the eTeller application.

SAVE MONEY

Use any laser printer that has a MICR toner manufactured for it. There is no need for an expensive tractor feed printer and the custom triplicate forms that go along with it. Use standard check paper from your local office superstore to save money.
