eBankSystems Announces New Customer

Lubbock-based Banking Software Firm growing its base of community bank customers.

LUBBOCK, TX July 7, 2008..... eBankSystems Inc., a leading provider of banking software applications and services for community banks, today announces it has successfully converted Granger National Bank to its flagship core processing system, Trinisys. Granger National Bank will also be deploying eBank's hosted internet banking application from Beacon Software and item processing software from eBank's item processing partner, Metavante Image Solutions.

Granger National Bank was established in 1920 and is the oldest bank in Granger, Texas. The bank is locally owned and operated and focuses primarily on agricultural lending.

"As a community bank, we wanted to work with a company that focuses specifically on providing solutions for community banks. During the conversion, we appreciated the open line of communication with eBankSystems and the effort the staff put forth to make the transition run as smoothly as possible," Dan Johnson, president of Granger National Bank said.

"We are extremely pleased to partner with Granger National Bank." Tripp Boren, Vice President of Operations, said. "Banks like Granger National are the backbone of their community and we are honored when they choose eBankSystems for their data processing needs."

About eBankSystems

eBankSystems is a solutions provider specializing in delivering complete turnkey systems for community banks. eBankSystems helps banks utilize technology to drive down costs, retain existing customers and attract new customers. Trinisys, eBankSystems flagship core processing application, allows banks to manage their operations efficiently and intuitively. eBankSystems partners with many industry leaders to provide ATM/EFT processing, internet banking, mobile and voice banking, platform automation and more, allowing banks to choose which ancillary products work best for them.
