

# Trinisys eStatements

Technology is changing banking. New methods of delivery allow your bank to provide a cost effective, environmentally friendly alternative for providing your customers their monthly statements. If you are starting a “Green” initiative in your institution or simply want to take advantage of greater postage savings, Trinisys eStatements can help you do it with ease and efficiency.

## Seamless Integration with Trinisys

Full integration with Trinisys means less hassle and fewer manual processes. You can run reports on your eStatement customers that will allow you to identify and target these customers. With many eStatement solutions, the customer database is separate from your core, which can cause a disconnect between the two systems and headaches for you and your staff.

## Complete Automation

Trinisys eStatements will automatically un-enroll your customers if they do not pick up their eStatements, which means you do not have to allocate staff resources to make sure you are in compliance with eStatement regulations. Trinisys eStatements also will automatically turn paper printing on and off based on enrollment status. There is no need to have employees monitoring the process or making manual changes based on a daily report.

## Different But Still the Same

Trinisys eStatements have the exact same look and feel of a paper statement. The eStatement includes all custom graphics and check images.

## COMPATIBILITY

Trinisys eStatements are delivered as an Adobe Portable Document Format (PDF). PDF is the most widely used document delivery format on the web. This allows customers to save the PDF on their computer, forward it to an accountant in an email, or simply print it on their home or office printer. Another advantage over paper statements is that your customers will have the ability to zoom in on the text and check images, making them as large as their computer monitor!
