

Trinisys RoundUP!

In today's competitive banking environment, you need to be able to offer the most innovative, creative products you can to increase customer loyalty and core deposits.

Trinisys RoundUP! is an exciting

new module for Trinisys that allows you to create products that will help your customers build up their savings accounts.

PAINLESS SAVINGS

Trinisys RoundUP! allows you to create routines that "round up" customer debit transactions to the nearest denomination you choose and deposit those funds to a savings account or high yield checking account. Round up to the nearest dollar, round up to the nearest nickel or nearest half dollar. The choices are unlimited! Your customers grow their savings balances automatically!

UNLIMITED ROUTINES

RoundUP! allows you to create unlimited round up routines, meaning you choose how items are rounded up and what amount. In addition to the flexibility within the routines, you can also have an unlimited number of routines, applying them to different products and customer segments.

INCENTIVE BASED PRODUCTS

One of the unique features of Trinisys RoundUP! is the ability for you to match funds for your customers.

If they use an account with a RoundUP! routine, you can choose to match a fixed amount or a percentage of the rounded up funds as part of a special customer incentive program.

The incentives are limited only by your imagination! If you can dream it, RoundUP! can build it.

SAVE TIME, SAVE MONEY

Trinisys RoundUP! is completely automatic and requires no intervention from your customers or bank personnel. It includes full reporting of RoundUP! activity for analysis purposes.
