eBankSystems Announces New Product

Lubbock-based Banking Software Firm continues to expand product offering for community bank customers.

LUBBOCK, TX March 24, 2009... eBankSystems, Inc., a leading provider of banking software applications and services for community banks, today announced its newest product, the Trinisys Call Report Wizard.

The Trinisys Call Report Wizard is a tool that will allow banks to quickly and easily create their call reports each quarter. The tight integration that the product has with Trinisys means the Call Report Data is exported to eBank's proprietary COLD system, OSCAR, for archiving and easy search and retrieval functions.

According to Tripp Boren, Vice President of Operations for eBankSystems, "Our new Call Report Wizard is an incredible tool that will save our customers time and money. It will eliminate manual gathering of data from the general ledger to spreadsheets or word documents. One of the major advantages of Trinisys has always been that we allow our customers to design how their chart of GL accounts will look and don't lock them in to an inflexible format. Due to this ability to customize the General Ledger, we needed to create the perfect tool to gather the data on a bank level. The one-time set it and forget functionality is very exciting."

About eBankSystems

eBankSystems is a solutions provider specializing in delivering complete turnkey systems for community banks. eBankSystems helps banks utilize technology to drive down costs, retain existing customers and attract new customers. Trinisys, eBankSystems flagship core processing application, allows banks to manage their operations efficiently and intuitively. eBankSystems partners with many industry leaders to provide ATM/EFT processing, Internet banking, mobile and voice banking, platform automation and more, allowing banks to choose which ancillary products work best for them.
